

Hotel Cleaner During COVID-19 Pandemic

- Interacts with few people each workday but cleans many rooms of people staying in hotel
- Many may be infectious (even without fever or symptoms)
- Works 6 hrs per day

	Hours Per Day		
Exposure Level	0-3 hr	3-6 hr	> 6 hr
Unlikely Exposure Minimal contact with sources	A	A	A
Possible Exposure Numerous contacts with potential sources	B	B	C
Likely Exposure Close contact with infected sources	B	C	C

Infected Person

Infectious Particles in Air

Uninfected Person

	Control	Source	Pathway	Receiver
Band	A	Do these first!	Do these next	Not necessary
	B	Do these first! May need several	Do these next May need several	Only if necessary*
	C	Do these first! May need multiple	Do these next May need multiple	May be prudent

Control Band B

Requires Multiple Source and Path Controls

- Source Controls
 - Impossible to exclude potentially infectious individuals from hotel
 - Only clean rooms after the guest has been checked out for 24 hours
 - Give guests a set of clean linens upon check-in
 - Guest can change bed and leave soiled linens in a bag in the hall
- Effect of Source Controls
 - Reduces interactions in potentially infectious areas
- Path Controls
 - May not be necessary

Only use PPE (respiratory protection) if necessary
